

## RCS402.2 + SDM504S

The RCS Series allows retailers to fully automate their cash handling procedures and recycle cash in house, with the following benefits:

- Increased visibility and control over cash
- Optimisation of cash management
- Savings on time, HR and CIT costs
- Improved efficiency and accountability
- Reduced cash holdings for better security.

### FUNCTIONS:

- **FLOAT DISPENSING** - At the start of their shift, each staff member logs in using their ID or a pin number. The RCS machine identifies the user and dispenses their preset float *in under 7 minute*. Coins are deposited directly into the till drawer by denomination; Notes are dispensed in sorted order from the note module, ready to be placed in the till.

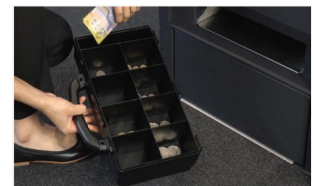

1. Operator Log in.

2. Insert UCD in chute.

3. Pick up note float.

4. Pick up coin float.

- **END-OF-DAY DEPOSIT** - At the end of their shift, each staff member goes back to the RCS machine and deposits the contents of their till in bulk. The RCS counts, sorts and stores the deposited cash in a safe-graded storage module, ready for the next operation.

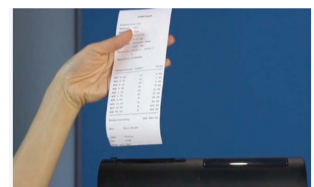

1. Operator Log in.

2. Bulk coin deposit.

3. Bulk note deposit.

4. Transaction receipt.

- **CASH EXCHANGE** - The RCS dispenses coin and notes upon request, or in exchange of large denomination banknotes - operating as a change machine throughout the day.

- **EXTENSIVE REPORTING** - Each transaction is logged by date, time, user ID, and totals by denomination and is available for charting/graphing purposes on a cloud-based platform.
