

SDS35

The SDS-35 is a compact smart deposit solution designed to be placed under the desk at the point of sale to instantly validate and secure high-value banknotes that come through at each transaction.

This high-performing loss prevention solution allows staff to skim the tills of excess or high value banknotes without leaving their working stations, hence improving their efficiency and overall safety.

The integrated, cloud-based CashComplete™ Connect software provides reporting and POS integration, providing full visibility of cash.

FEATURES

- Processes, secures and validates banknotes at a speed of 2.5 seconds per banknote.
- Banknotes' verification is performed by SUZOHAPP's MFL Bill validator, with 4-way read, self centering validator proven to deliver superior protection against counterfeits.
- Storage capacity of up to 1,000 banknotes. Notes are stacked flat in a lockable cassette, ready for CIT pickup, banking or ATM replenishment.
- Consolidated cash overview, reporting and machine monitoring by connecting to the cloud based, CashComplete™ Connect management platform.
- Highly intuitive user interface and integrated touchscreen display ensure maximum usability.
- Less than 45cm tall and weighing only 21,8kg, the SDS-35 can be mounted directly under your counter top or bolted to the floor at the point of sale.
- UL, CE and FCC safe options available.
